10.4" IPB

All-in-one solution
USB host port for content changes

IPB Panel Frame

Push button navigation
Network connection for scheduled updates

Interactive Push Button (IPB) Panel
Access content at the push of button

Targeted Content

The IPB Panel enables the user to select exactly what content they want to view or access. This interactive digital signage solution is ideal for stores and various locations where the intent is not to push random content, but to provide useful information related to the individual's interest. The cutting edge PB Panel can be used just about anywhere for targeted advertising with up to date content playing from its internal CF card, all maintained from a central server.

Special Features

The Information Scan (IS) Station provides an all-in-one barcode scanner and digital signage solution. The multi-zone display allows you to play content for customers, while giving the option to scan products for pricing and other related information. It is the perfect solution for promoting products while meeting the customer's informational needs.

- Barcode scanning capability
- Hardware and software watchdog timer (WDT)
- Real time clock with battery (RTC)
- Multiple playlist support to allow scheduled content playback
- Bitmap based ticker (scrolling text message)
- Scheduled content download from HTTP or FTP server
- Upload function to get feedback via FTP
- Automated play modes for easy setup
- USB auto-copy function for easy updates by staff
- Firmware upgradeable through CF card, USB drive or network
- Up to 1080p high definition video output
- Digital audio/video output over HDMI
- ISO, WMV 9 and H.264 high definition playback support
- 802.11 b/g wireless connection with WEP 64-bit and 128-bit support (WPA available on request)
- RS-232 serial connection for interactive input via touch panel, keyboard or barcode reader
- Multilingual GUI with support for external TTF font

The IS Station – Your Digital Sales Assistant

Digital signage evolved from dynamic advertisements into digital sales assistants. The D8M3 IS Station is the perfect digital signage solution for the retail industry. It is specifically designed to be used in retail outlets such as malls, clothing stores, super stores, and pharmacies. This digital signage solution is the optimal tool for:

- Selling and promoting products 24/7
- Educating and instructing potential customers and staff
- Providing the most up-to-date product information

Always ready and able to help, this Digital Sales Assistant provides instant access to related product information and pricing simply by scanning the barcode of a product. Quick, simple, informative, all with one swipe.

inXtron Welcomes OEM/ODM Opportunities

inXtron welcomes the opportunity to work with OEM/ODMs to create innovative product solutions that exceed expectations.
Our products can be tailored to meet your branding, style and feature requirements or we can work with you to create custom product solutions.
